

Critical Areas Sign Specifications

DR043

How should I design my Critical Areas signs?

The City of Redmond maintains design specifications for three different types of Critical Areas signs: Streams, Wetlands, and Native Growth Protection Easements. This guide provides detailed specifications for each sign type, including: sign material and size as well as the required graphics, wording, and preferred font stylization and sizes.

The graphic to the right provides guidance on the design specifications for **all** Critical Areas sign plates. Signs must conform to the length, width, sign plate material, and corner radii.

The three Critical Areas signs are displayed on the reverse side of this guide. These signs contain the relevant text that must be displayed for each sign type such as the sign notice name, a “do not disturb” notice, and city contact information. Additionally, the font type and font sizes for each portion of the signs are outlined in detail below the signs.

If further assistance is required, the Planner On Call is available to respond to questions via e-mail (planneroncall@redmond.gov) or phone at 425-556-2494.

Individual Design Specifications for Critical Areas Signs

Stream & Wetland Sign Specifications

The font sizes for the Stream and Wetland signs are identical. As shown above, the only difference between the signs are their respective titles. The font style and sizes for each part of the sign should be reflected in the reproduction of a sign as follows:

Font Style—Vrinda

Title—330 point

Buffer Boundary—160 point

Do Not Disturb—85 point

Contact—80 point

NGPE Sign Specifications

The font type and sizes for each part of the sign should be reflected in the reproduction of a sign as follows:

Font Style—Vrinda

Title—130 point

Planting and Buffer Area—75 point

Do Not Disturb—85 point

Contact—80 point
